

Sustainable Finance. Global Context and the Case of Spain: Aligning with the Paris Agreement?

Elcano Royal Institute, Madrid.

Wednesday, 4 December 2019, 10:00h – 12:00h.

The Paris Agreement set a crucial milestone in the fight against climate change, calling for an accelerated and unprecedented systemic change at the political, economic, financial, technological and social levels. Leading speakers will analyze *where the international financial system stands* today in terms of alignment with the Paris Agreement's objectives. A report on sustainable finance in Spain will also be presented – in the framework of the 3fP-Tracker: Finance fit for Paris project.
